

What data is sent to ProvenWorks servers when using AddressTools?

This guide will cover:

- AddressTools Free
- AddressTools Premium

Answer

The org details which are public on the partner support interface are sent to us and we receive general org information which is used for licencing and credit validation.

If you use our interactive street level or batch validation then address blocks are sent to our servers for processing.

Contact Us

If you have any other questions relating to AddressTools free or premium then please do not hesitate to contact us at: support@provenworks.com

We will be happy to answer any questions or help with any problems you may have.
